ACHIEVEMENTS

- ▶ IELTS Band 7.5
- ▶ Webcamp Module Winner
- ▶ Graphic Design — Arena Multimedia
- ▶ ICISCT 2020 Conference Contributor
- ▶ Comstech OIC Workshop Participant

PROFESSIONAL SUMMARY

Fullstack & Web3 developer with **5+ years** building production applications across the entire stack from React/Next.js frontends and NestJS backends to Solidity smart contracts and AI-powered systems. Currently at **Permission.io (US-remote)** as **Senior Fullstack Web3 Developer**, leading development of AI Agents using **Google ADK** and **A2UI**, building Chrome browser extensions, and owning all blockchain infrastructure including cross-chain token contracts (LayerZero OFT), account abstraction, and wallet systems. Proven track record delivering complex Web3 DeFi platforms, multivendor applications, and MCP-style agent APIs for LLM integration. Strong English communicator (IELTS 7.5), comfortable in distributed Agile teams.

WORK EXPERIENCE

Senior Fullstack Web3 Developer

Permission.io — US Remote

Oct 2024 – Present

- Built and migrated **AI Agents** (Onboarding Agent, Permission Agent) to **Google ADK v1.28**; implemented A2UI chat interfaces with real-time LLM state management across desktop and mobile.
- Architected an **MCP-style Agent API** exposing protocol state (agreements, proofs, escrow events) for LLM/agent consumption without requiring UI interaction.
- Deployed **LayerZero OFT** cross-chain contracts on Base and Polygon; built batch withdrawal contracts with gas management and exploit-prevention caps.
- Led **Chrome Extension** development: onboarding flows, ASK token reward logic, environment configs, and multi-sprint product feature mapping.
- Directed **Stripe integration** for .ASK TLD domain purchases, including checkout, tax, webhooks, and PayPal fallback flows.

Fullstack Software Engineer

Dechains

2021 – 2024

- Led frontend on a large-scale **multivendor ecommerce platform** with real-time features, complex product management, and role-based access.
- Built multiple **DApps**: NFT marketplaces, DeFi farms aggregator, NFT games — integrating Wagmi/Ethers.js wallets, smart contracts, and The Graph subgraphs.
- Managed **AWS deployments** (EC2, S3, Beanstalk, CodeBuild, Route 53) and published reusable npm libraries used across projects.

Junior Frontend Developer

Novasoft

2021

- Developed responsive React interfaces for client-facing web applications; handled DevOps tasks and environment configuration.

Frontend Developer

Slectus

2021

- Built frontend features and UI components for client projects; contributed to early product development.

Freelance Web and Web3 Developer

Fiverr

2020 – 2022

- Delivered web development and early Web3 DApp projects for international clients; ran Meta/Facebook Ads campaigns and used Google Analytics for client marketing work.

PROJECTS HIGHLIGHT

Contrax Finance DeFi Farms Aggregator · Solidity, Ethers.js, React, Subgraphs	NFT Village / NFT Comics NFT Marketplaces · Next.js, Wagmi, IPFS, Smart Contracts
Mutant Froggo / Project Kaito / Elvantis NFT Games · Solidity, React, Game Mechanics, Web3	Permission Protocol Viewers React DApp · Agreements, Consent Proofs, Escrow/ASK Balances
PitchFi Side Project Decentralized Crowdfunding · Solidity, Hardhat, Next.js, Viem, Merkle Proofs, USDC	Swippy Ecommerce Fullstack · Express, React, MongoDB, Real-time
KU Point Tracker Mobile · React Native, Expo, Firebase	

ADDITIONAL EXPERIENCE

Digital Marketing & Analytics · Entry Level / Freelance — Experience running **Meta/Facebook Ads** campaigns and working with **Google Analytics** and **PostHog** to track performance, analyse user behaviour, funnels, and report on conversion metrics. Complements fullstack work with hands-on understanding of product analytics and ad attribution.

Design · Entry Level — Working knowledge of **Adobe Illustrator** for vector graphics, UI assets, and brand materials.
